Andrew is a quantity surveyor with more than 15 years' experience in public and private sector housing, education, corporate and leisure construction projects, along with substantial experience in framework set up, management and project delivery. He is Partnership Director of NPS Leeds and currently a Board Director for NPS Humber.

Andrew works with local authorities at a strategic level, defining their priorities including sustainability, the climate change emergency, funding and efficient delivery of projects.

Notable projects he has worked on include Framework Management for South and West YorConsult, East and North YorConsult, Bradford Architectural and Design Framework, City West Design Framework and Kirklees Mechanical, Electrical and Clerk of Works Framework. He also oversaw Leeds City Council's first Cost Led Procurement project for Shakespeare Primary School, valued at £10 million.

Much of his focus today is on full capital delivery programmes, including new-build, residential, educational and other projects.

He was involved in the Whinmoor Grange Horticultural Glasshouse project; Temple Green Park and Ride, the city's first park and ride, and Stourton Park and Ride, the country's first fully solar powered park and ride.

“ My greatest passion is the work I do with the public sector, ensuring we deliver good quality, cost-effective housing, education and other projects for the people of Leeds. It is about contributing to the local economy, helping to improve the city and really making a difference to the local community. ”
