A chartered town planner with over 25 years' planning and development experience, Jonathon oversees and manages three multi-skilled teams that provide a range of professional planning, land surveying and asset realisation services to public sector and private clients.

Within this team, he identifies and realises new business opportunities and advises clients on asset realisation and disposal options. He also finds and promotes land for major residential and commercial uses, and prepares, submits and monitors major development applications.

Past projects include the management and project lead for external consultants for the discharge of pre-commencement and occupation conditions for the RIBA 2019 Sterling Award-winning Goldsmith Street Passivhaus development in Norwich.

Jonathon also oversaw the promotion of a 25-hectare greenfield site for major mixed-use development and was planning lead for the promotion and receipt of outline planning permission for a 9.3-hectare greenfield site for 200 dwellings.

He was also pleased to be able to lead on a project for full planning permission for 22 dwellings on a 0.9-hectare greenfield site, which had significant planning constraints.

“ I am an effective, motivated, driven and confident manager, with technical knowledge of the UK planning system and excellent project management skills, who is able to provide the full range of planning, development and property and consultancy advice. ”
